PROFESSIONAL EXPERIENCE

Founder & Technology Consultant | Crazy Adventurers Web & App Development

Hurghada, Egypt | Current

- Deliver end-to-end web development, cybersecurity, hosting, SEO, UI/UX and systems support for businesses and individual clients.
- Design and develop responsive websites, dashboards and web applications aligned with client branding, workflows and operational requirements.
- Conduct authorized website security assessments, vulnerability testing and technical risk reviews, then provide practical remediation guidance.
- Manage domains, DNS records, SSL certificates, hosting accounts, backups, website migrations and production deployments.
- Build and maintain solutions using HTML, CSS, JavaScript, PHP, Python, SQL, React, Next.js, Vite and Tailwind CSS.
- Troubleshoot website, server, DNS, SSL and deployment issues while providing ongoing maintenance and client support.
- Create technical SEO improvements, interface designs, service content and digital marketing assets to strengthen clients' online presence.

SELECTED PROJECTS

MEMO Aqua Center Operations Management System - Web Application / Operations Platform

- Developed a centralized operational dashboard for hotels, drivers, vehicles, trips and daily transportation workflows.
- Included Smart Dispatch, map-based monitoring, reports, notifications, settings and structured administrative controls.
- Focused on usability, clear data organization and practical coordination for a tourism and transport business.

KemetX Tours - Tourism Website & Digital Presence

- Structured tourism services, excursions, booking information and customer contact channels in a responsive web experience.
- Integrated the company's social media presence and prepared the digital content for clear visitor communication and lead generation.
- Supported website deployment, online visibility and ongoing business presentation for the Hurghada tourism market.

Crazy Adventurers Services Website - Portfolio & Service Platform

- Created the brand website at mycyberman.netlify.app to present web development, mobile apps, cybersecurity, SEO and system administration services.
- Built a unified service identity around the message: "We Build. We Secure. We Grow."
